

# DIBALDO

## PARACELSO GIN ♂

**Classification:** Gin

**Alcohol content:** 45% by the vol.

**Bottle size:** 50 cl.

**Production method:** Paracelso Gin is the result of the union of several distillates and alcoholates of the highest quality, expertly produced and blended. The essences and botanicals behind Paracelso come from the international perfumery's market, to ensure the olfactory and tasting property characteristic of every Essenza DiBALDO.

**Organoleptic profile:** Paracelso is identifiable as a Cologne to wear on the palate.

**Tasting notes:** following Baldo Baldinini's stylistic code, this gin is a perfume to wear on the palate, whose recipe is strictly secret and undeclared. In complete DiBALDO's style, each Essenza reflects perfumery's expressive profile: smooth or mixed, Paracelso opens its Cologne scents in top, heart and base notes, in a sensorial experience both olfactory and tasty of the highest level.

**Top notes:** Cologne floreal chords.

**Heart notes:** Mediterranean scents.

**Base notes:** bark's shades.

**How to taste it:** smooth, on the rocks or mixed, for a Gin&Tonic we suggest the pairing with neutral tonic waters and a lot of ice, to let Paracelso express all its aromatic chords.

Paracelso's concentration makes sure that with 1oz of gin and 18cl of tonic water, you can have a complete and balanced Gin&Tonic.

DiBALDO's Essenze have a high aromatic intensity to promote alcohol consumption in a contained and responsible way.
