

# DIBALDO

## GIN AU79

### GIN ORO

**Classification:** Saffron Dry Gin

**Alcohol Content:** 45% by the vol.

**Bottle size:** 50cl.

**Production method:** AU 79 Gin is the result of the raw materials' careful processing strictly selected by DIBALDO among the finest botanicals and essences used in perfumery, with production process that DIBALDO intends to keep secret, to protect the strong personality of this gin.

**Organoleptic profile:** AU 79 Gin is an unmistakable Saffron scent to be worn on the palate.

**Tasting notes:** Gin AU 79 represents an ideal bridge between the citrusy aromas of the Mediterranean and the spicy aromas of the Silk Road. The aromatic chords are presented with the stimulating freshness of the top notes, then developing in a structural crescendo of the best Saffron stigmas in the world, giving depth and warmth to the aromatic bouquet, concluding with a very long finish in exotic notes that rediscovers the richness of the Mediterranean notes.

**Top notes:** Mediterranean winds.

**Heart notes:** oriental silk and Saffron pistils.

**Base notes:** very fine, they express a long intertwining between fresh and delicately spiced notes.

**How to taste it:** cold, smooth or mixed, for a Gin&Tonic we suggest mixing it with neutral tonics and a lot of ice, to allow AU 79 Gin express its aromatic chords in the best way possible.

Absolute in a food pairing.

**Curiosity:** the name of this gin derives from the symbol (AU) and the atomic number (79) of gold. The maximum naturalness of the raw materials used in the recipe means that, if exposed to the sun, the golden color of the gin loses its chromatic intensity. We therefore recommend storing it in a cool place away from direct sunlight.
